

All-Cause Mortality by Vaccination Status by Craig Paardekooper

Reference : [Deaths by vaccination status, England - Office for National Statistics](#)

APRIL 2021

Vaccination status	Count of deaths	Person-years	Age-standardised mortality rate / 100,000 person-years
Unvaccinated	3,556	1,627,374	2087.2
First dose, less than 21 days ago	428	225,906	1851.2
First dose, at least 21 days ago	16,237	1,271,496	1594.8
Second dose, less than 21 days ago	5,431	402,753	470.9
Second dose, between 21 days and 6 months ago	5,884	218,219	709.1

MAY 2021

Unvaccinated	2,871	1,440,421	1720.2
First dose, less than 21 days ago	155	186,246	1614.5
First dose, at least 21 days ago	8,123	844,993	5002.5
Second dose, less than 21 days ago	3,373	525,787	777.1
Second dose, between 21 days and 6 months ago	19,529	875,765	766.2

JUNE 2021

Unvaccinated	2,385	1,081,514	1537.8
First dose, less than 21 days ago	93	219,920	1809.9
First dose, at least 21 days ago	3,697	461,837	6358.5
Second dose, less than 21 days ago	976	406,838	1462.1
Second dose, between 21 days and 6 months ago	25,687	1,580,685	791.7

JULY 2021

Unvaccinated	2,553	898,740	1681.5
First dose, less than 21 days ago	70	127,971	1101.5
First dose, at least 21 days ago	2,331	463,938	6036.0
Second dose, less than 21 days ago	325	214,015	1885.4
Second dose, between 21 days and 6 months ago	30,819	2,145,514	1348.2
Second dose, at least 6 months ago	1,208	28,063	578.1

AUGUST 2021

Unvaccinated	2,557	834,628	1758.7
First dose, less than 21 days ago	39	43,541	1875.3
First dose, at least 21 days ago	1,522	315,220	4780.4
Second dose, less than 21 days ago	131	202,848	1467.3
Second dose, between 21 days and 6 months ago	31,314	2,442,539	919.7
Second dose, at least 6 months ago	1,733	41,936	680.4

SEPTEMBER 2021

Unvaccinated	2,394	753,541	1722.5
First dose, less than 21 days ago	18	36,815	741.9
First dose, at least 21 days ago	1,235	174,341	4636.0
Second dose, less than 21 days ago	53	116,941	977.8
Second dose, between 21 days and 6 months ago	29,265	2,542,509	985.2
Second dose, at least 6 months ago	5,170	122,229	1067.6
Third dose or booster, less than 21 days ago	87	11,415	220.2

OCTOBER 2021

Unvaccinated	2,379	726,117	1705.5
First dose, less than 21 days ago	20	43,120	1907.5
First dose, at least 21 days ago	1,154	164,401	4727.9
Second dose, less than 21 days ago	54	38,582	1944.6
Second dose, between 21 days and 6 months ago	14,530	2,235,223	1248.1
Second dose, at least 6 months ago	18,767	361,802	1759.7
Third dose or booster, less than 21 days ago	3,766	256,858	396.4
Third dose or booster, at least 21 days ago	1,145	59,043	482.2

NOVEMBER 2021

Unvaccinated	2,473	639,411	1862.9
First dose, less than 21 days ago	33	45,076	3740.5
First dose, at least 21 days ago	855	187,375	3857.8
Second dose, less than 21 days ago	52	23,868	2185.5
Second dose, between 21 days and 6 months ago	3,746	1,477,694	1870.4
Second dose, at least 6 months ago	18,885	488,331	2835.2
Third dose or booster, less than 21 days ago	4,676	433,365	587.1
Third dose or booster, at least 21 days ago	11,186	466,157	705.4

DECEMBER 2021

Unvaccinated	2,787	623,517	2087.7
First dose, less than 21 days ago	19	26,486	1473.4
First dose, at least 21 days ago	855	207,004	4198.1
Second dose, less than 21 days ago	44	36,134	1620.9
Second dose, between 21 days and 6 months ago	1,312	778,510	2483.2
Second dose, at least 6 months ago	12,644	397,161	4804.8
Third dose or booster, less than 21 days ago	3,512	659,719	1037.8
Third dose or booster, at least 21 days ago	24,568	1,159,587	856.4

A Morbid History of First Dose Casualties

Initially, in April 2021, the First Dose vaccinated appear to have a 10% lower all-cause mortality. However, one month later, those who had a first dose had a 290% greater all cause mortality.

This only got worse in succeeding months for those who had taken a first dose. Here is the data for those who had a first dose atleast 21 days ago in 2021 –

- April 11% lower all-cause mortality compared to unvaccinated
- May 290% greater all-cause mortality compared to unvaccinated
- June 413% greater all-cause mortality compared to unvaccinated
- July 359% greater all-cause mortality compared to unvaccinated
- August 271% greater all-cause mortality compared to unvaccinated
- September 269% greater all-cause mortality compared to unvaccinated
- October 277% greater all-cause mortality compared to unvaccinated
- November 207% greater all-cause mortality compared to unvaccinated
- December 201% greater all-cause mortality compared to unvaccinated

Did the First Dosers Strike it Lucky in 2022

JANUARY 2022

Unvaccinated	2,530	594,237	2009.7
First dose, less than 21 days ago	32	22,056	3176.7
First dose, at least 21 days ago	724	189,047	3882.7
Second dose, less than 21 days ago	44	38,198	2227.8
Second dose, between 21 days and 6 months ago	591	365,852	2747.8
Second dose, at least 6 months ago	6,996	273,691	5118.1
Third dose or booster, less than 21 days ago	1,169	294,689	1813.6
Third dose or booster, at least 21 days ago	32,122	2,111,514	918.1

FEBRUARY 2022

Unvaccinated	1,748	522,411	1531.1
First dose, less than 21 days ago	13	11,451	2442.8
First dose, at least 21 days ago	498	151,961	2897.3
Second dose, less than 21 days ago	11	31,108	1406.3
Second dose, between 21 days and 6 months ago	326	257,098	2009.9
Second dose, at least 6 months ago	3,887	288,352	3279.9
Third dose or booster, less than 21 days ago	212	41,801	2034.7
Third dose or booster, at least 21 days ago	30,685	2,210,123	940.2

MARCH 2022

Unvaccinated	1,801	573,493	1449.9
First dose, less than 21 days ago	12	5,891	5185.8
First dose, at least 21 days ago	485	154,369	2529.0
Second dose, less than 21 days ago	11	20,056	1215.1
Second dose, between 21 days and 6 months ago	307	232,189	2324.8
Second dose, at least 6 months ago	3,515	379,908	2756.3
Third dose or booster, less than 21 days ago	103	23,931	1972.3
Third dose or booster, at least 21 days ago	34,666	2,502,239	953.1

APRIL 2022

Unvaccinated	1,631	553,347	1366.3
First dose, less than 21 days ago	6	3,930	x
First dose, at least 21 days ago	464	135,231	2646.2
Second dose, less than 21 days ago	12	14,224	2625.4
Second dose, between 21 days and 6 months ago	247	201,830	2354.6
Second dose, at least 6 months ago	2,838	391,489	2381.9
Third dose or booster, less than 21 days ago	87	17,095	1481.8
Third dose or booster, at least 21 days ago	35,052	2,450,610	989.7

MAY 2022

Unvaccinated	1,443	571,729	1147.5
First dose, less than 21 days ago	3	2,811	x
First dose, at least 21 days ago	404	129,962	2281.1
Second dose, less than 21 days ago	11	10,092	2688.9
Second dose, between 21 days and 6 months ago	170	194,571	1887.6
Second dose, at least 6 months ago	2,345	415,500	1955.2
Third dose or booster, less than 21 days ago	114	15,522	2229.7
Third dose or booster, at least 21 days ago	33,116	2,554,362	922.9

JUNE 2022

Unvaccinated	1,342	555,298	1089.5
First dose, less than 21 days ago	3	1,522	x
First dose, at least 21 days ago	311	119,095	1866.5
Second dose, less than 21 days ago	7	6,688	x
Second dose, between 21 days and 6 months ago	110	162,953	1643.9
Second dose, at least 6 months ago	2,019	424,743	1759.2
Third dose or booster, less than 21 days ago	69	10,105	2555.9
Third dose or booster, at least 21 days ago	31,895	2,490,225	899.4

JULY 2022

Unvaccinated	1,591	576,402	1293.7
First dose, less than 21 days ago	2	1,221	x
First dose, at least 21 days ago	365	115,163	2144.0
Second dose, less than 21 days ago	2	7,195	x
Second dose, between 21 days and 6 months ago	88	128,355	1993.8
Second dose, at least 6 months ago	1,990	475,002	1684.9
Third dose or booster, less than 21 days ago	35	9,411	1988.9
Third dose or booster, at least 21 days ago	34,656	2,585,234	938.3

AUGUST 2022

Unvaccinated	1,346	579,517	1082.1
First dose, less than 21 days ago	0	923	x
First dose, at least 21 days ago	318	110,295	1848.0
Second dose, less than 21 days ago	1	4,024	x
Second dose, between 21 days and 6 months ago	65	88,111	2123.7
Second dose, at least 6 months ago	1,764	514,588	1484.1
Third dose or booster, less than 21 days ago	4	6,607	x
Third dose or booster, at least 21 days ago	32,993	2,595,715	883.8

SEPTEMBER 2022

Unvaccinated	1,228	564,478	1014.5
First dose, less than 21 days ago	1	495	x
First dose, at least 21 days ago	299	105,362	1789.8
Second dose, less than 21 days ago	1	1,605	x
Second dose, between 21 days and 6 months ago	40	61,881	1854.3
Second dose, at least 6 months ago	1,710	521,618	1480.4
Third dose or booster, less than 21 days ago	3	2,469	x
Third dose or booster, at least 21 days ago	31,864	2,517,875	883.1

OCTOBER 2022

Unvaccinated	1,402	587,345	1142.7
First dose, less than 21 days ago	1	441	x
First dose, at least 21 days ago	338	107,708	2071.4
Second dose, less than 21 days ago	1	1,339	x
Second dose, between 21 days and 6 months ago	36	45,200	2639.0
Second dose, at least 6 months ago	1,840	559,079	1583.5
Third dose or booster, less than 21 days ago	5	427	x
Third dose or booster, at least 21 days ago	36,841	2,601,771	984.9

NOVEMBER 2022

Unvaccinated	1,279	572,382	1083.9
First dose, less than 21 days ago	2	368	x
First dose, at least 21 days ago	316	103,400	1980.1
Second dose, less than 21 days ago	0	991	x
Second dose, between 21 days and 6 months ago	26	31,361	2542.4
Second dose, at least 6 months ago	1,716	554,811	1477.5
Third dose or booster, less than 21 days ago	0	188	x
Third dose or booster, at least 21 days ago	34,558	2,515,455	949.0

DECEMBER 2022

Unvaccinated	1,227	595,507	1026.7
First dose, less than 21 days ago	2	215	x
First dose, at least 21 days ago	269	106,442	1741.1
Second dose, less than 21 days ago	1	590	x
Second dose, between 21 days and 6 months ago	18	23,381	2450.6
Second dose, at least 6 months ago	1,670	583,410	1453.2
Third dose or booster, less than 21 days ago	0	84	x
Third dose or booster, at least 21 days ago	34,905	2,596,443	935.9

Morbid History Repeats Itself

Here is the data for those who had a first dose atleast 21 days ago in 2022 –

- January 193% greater all-cause mortality compared to unvaccinated
- February 189% greater all-cause mortality compared to unvaccinated
- March 174% greater all-cause mortality compared to unvaccinated
- April 193% greater all-cause mortality compared to unvaccinated
- May 198% greater all-cause mortality compared to unvaccinated
- June 171% greater all-cause mortality compared to unvaccinated
- July 165% greater all-cause mortality compared to unvaccinated
- August 170% greater all-cause mortality compared to unvaccinated
- September 176% greater all-cause mortality compared to unvaccinated
- October 181% greater all-cause mortality compared to unvaccinated
- November 182% greater all-cause mortality compared to unvaccinated
- December 170% greater all-cause mortality compared to unvaccinated

Quiet Death Toll

Something in this very safe and effective vaccine was consistently doubling all-cause mortality every single month over a 2 year period !

The vaccine was meant to protect people from COVID-19. It was meant to protect and increase their health. So why does it have a *“side-effect”* where it doubles their rate of death ?

Governments knew

So this is the UK governments own data. Governments have had this data since April 2021, yet have not faltered in recommending the vaccines. In the USA, it has just been mandated for babies - putting it on the childhood vaccine schedule.

They know, but carry on regardless.

Censorship

Consider that governments have not just ignored safety signals, but have ACTIVELY suppressed them

1. **Media Censorship**
 - a. censored any post that was deemed to cause vaccine hesitancy on Twitter
 - b. deleted hundreds of thousands of testimonies of vaccine injury from Facebook
 - c. took down videos that were trying to warn people on Youtube
2. **Censorship of Doctors** : Took away the licences of doctors who spoke out, or who even offered safe alternative medication.
3. **No Informed Consent** : ensured that people were not told about adverse effects prior to vaccination. Not telling people that it could kill them or severely injure them
4. **No Free Consent** : used coercion to force people into taking these vaccines. No job, no education, no entrance to shops, no medical treatment, no travel, using hate speech to label the unvaccinated as murderers.
5. **Without Parent's Consent** : Governments have introduced a policy that children can be vaccinated without parental consent. Children are not informed of the dangers, and are coerced by adults (“authority” figures, such as teachers) into taking these vaccines.
