

Are You Living Through the Exodus Plagues ?

You have probably noticed that since the year 2000 there has been one declared plague after another.

- 2002-4 Sars1
- 2008 H5N1 Swine Flu
- 2015 H5N2 Bird Flu
- 2020 Sars2

So we are living in the generation of plague. Declaring a plague and pushing the associated vaccines is certainly a big business, as are cures for vaccine injuries.

Simultaneous with the rising number of childhood vaccines, there has been a steady drop in recovery from vaccine adverse effects [[Recovery](#)], and a steady increase in childhood comorbidities – resulting in a sickly society – prone to disease.

What are the Current Plagues ?

- **Plague of blood**
[[Menstrual Disorder](#) , [Cardiac Disorder](#) , [Vascular Disorder](#)]
- **Plague of boils**
[[Vasculitis](#) , [Herpes](#) , [Lupus](#)]
- **Plague on First Born**
[[Sudden Death](#)]
- **Plague of darkness**
[[Censorship](#)]

And what is the Plague on the First Born, if not the sudden death of young people.

These plagues of blood, boils, firstborn and darkness occurred just prior to the Exodus, when God's people were separated from the Egyptians, and departed to form a separate Kingdom of God.

These plagues are also listed in Revelations as immediately preceding the establishment of the Kingdom of God.

So when people ask "Where is the evidence for the Exodus?" - perhaps you are living through it.
