

Reign of Fire

by Craig Paardekooper

Here are the things that characterize the time of the beast (Revelation 13) -

1. **ONE WORLD GOVERNMENT:** All nations submit to a single authority. The first Beast has authority over every tribe, people, language and nation - so it is a singular world power.
2. **42 MONTHS:** The global authority of the first Beast lasts 42 months
3. **EVIL:** The behavior of the first Beast is lawless and corrupt – but not just in personal selfish ways – but rather in a fanatical and idealistic way – dedicated to the destruction of people, and to the opposition of our core values.
4. **666:** After 42 months a second Beast appears - identified by the number 666.
5. **PURPOSE:** The aim of the second Beast is to make people follow the first Beast. The second Beast has the same purposes as the first, but uses surveillance and transactional control to enforce compliance.
6. **FIRE FROM HEAVEN:** The second Beast causes fire to come from heaven to earth.
7. **SURVEILLANCE:** The second Beast monitors everyone.
8. **CONTROL OF TRANSACTIONS:** The second Beast introduces a mark to authorize transactions.

Parallels with Current Events

There are a number of parallels between these characteristics and our current circumstances.

One World Government: Starting in March 2020, all countries began to act as if under one central authority - with simultaneous lockdowns in every country. It was as if countries ceased to exercise independence of thought and action. They all adopted the same slogans, the same protocols, regardless of the destructiveness to their own economies or people.

[Simultaneous beginning of lockdowns](#)

Evil and Lawless: There was a complete disregard for laws established to protect us - health and safety, employment, discrimination, informed consent, bodily autonomy, constitutional law and human rights. Governments used propaganda and deception on a huge scale to incite fear. Helpful medicines were banned. Society as a whole was told that lockdowns would persist until people took an experimental injection, and people were coerced to take this genetic therapy or lose their job. Governments and media were active in censoring and suppressing information about millions of vaccine injuries and deaths.

Number of the Beast: 42 months after lockdowns began, the second Beast declared himself.

[Declaration of the Beast](#)

Control of Transactions: These events coincide with a push to introduce digital id, digital surveillance and digital control.

[Data Bills and Total Surveillance](#)

Fire from Heaven: These events also coincide with many unusual fires in the US and in Chile, showing some evidence of being caused by a direct energy weapon. Cars and homes are targeted rather than trees. Homes are turned to white ash, and cars are raised to such high temperatures that their windscreens melt and run over the dashboard, whilst adjacent trees are left with their leaves untouched.

It is not often that all these elements come together.

Robert Brame's Investigations of the California Fires

Robert Brame is a botanist who has investigated the aftermaths of 46 large fires in California. In almost all of them, he found the following irregularities that don't fit with natural causes:

1. The melting of glass and aluminum alloys (wheel rims) shows that the maximum temperatures are higher than in natural wildfires.
2. Whether a given object burns or melts depends on its material, but in a very unusual way:
 - a. Plastic objects do not burn or melt.
 - b. Objects made of metal either melt themselves, or they ignite combustible materials with which they are in direct contact. Examples are nails and screws in wooden fences and steel meshes in care tires. In remarkable contrast, tires reinforced with polymer fibers do not burn.
 - c. The plants or parts of plants that are normally the most easily ignited by flames are the least likely to burn in these anomalous fires. When trees do burn, it is usually from the inside out, and this most affects the trees that store the most water, e.g., willow trees, which are normally almost non-flammable.
3. Houses and cars are destroyed, as if they had been in an enormous firestorm. At the same time, however, trees on the same properties are left standing – dead, presumably from internal heating, but with green leaves on the outside. Similarly, metal-framed trailers are destroyed, but the wooden decks right next to them remain intact.

These observations indicate that

1. the fires do not spread by serial ignition of combustible material,
2. heat energy in these fires seems to originate primarily from metal objects and from the sap of water-rich plants, even though these are not combustible.

The collective evidence does not add up with natural causes or with conventional arson. An investigation into other non-natural causes (possibly directed energy weapons) is needed.

As the video shows, the fires resemble a microwave effect - where heating is from the inside - and where metal objects, and objects that have high-water content are melted or burned in preference to organic, dry matter. Dry combustible wood or leaves are unaffected. Plastics and polymers are unaffected.

A directed energy weapon is a possibility.

These mysterious fires are yet another confirmation of Revelation, where the Beast is said to bring down fire from heaven in full view of men. These fires may be a graphic demonstration of power and ruthlessness, intended to impress national leaders, and induce their compliance.

Mentioned in the Bible

Besides the mention of fire from heaven in Revelation, this form of destruction is also mentioned in Genesis 19 v 24 and in 5 other places in the Bible.

<https://www.gotquestions.org/fire-from-heaven.html>

In Genesis 19, when the angels visited Lot and were accosted in Sodom, they used a **light** weapon to blind the attackers. Then fire from heaven incinerated the whole city.

However, it is the first occasion in modern times that this phenomenon has appeared, and it coincides with the other characteristics of the Beast's reign.

So, who or what caused these fires – human or angel, good or bad? Authorities are removing evidences after each fire, misattributing the effects, and failing to investigate the causes.

The nature of these fires indicates that they are unnatural and therefore intentional. So, what is their intention or purpose? Why are some areas being targeted more than others? Perhaps a map of all fire locations will reveal an answer.
