

World at War – a brief analysis of DMED data

By Craig Paardekooper

Counting the Military Population USA 2021

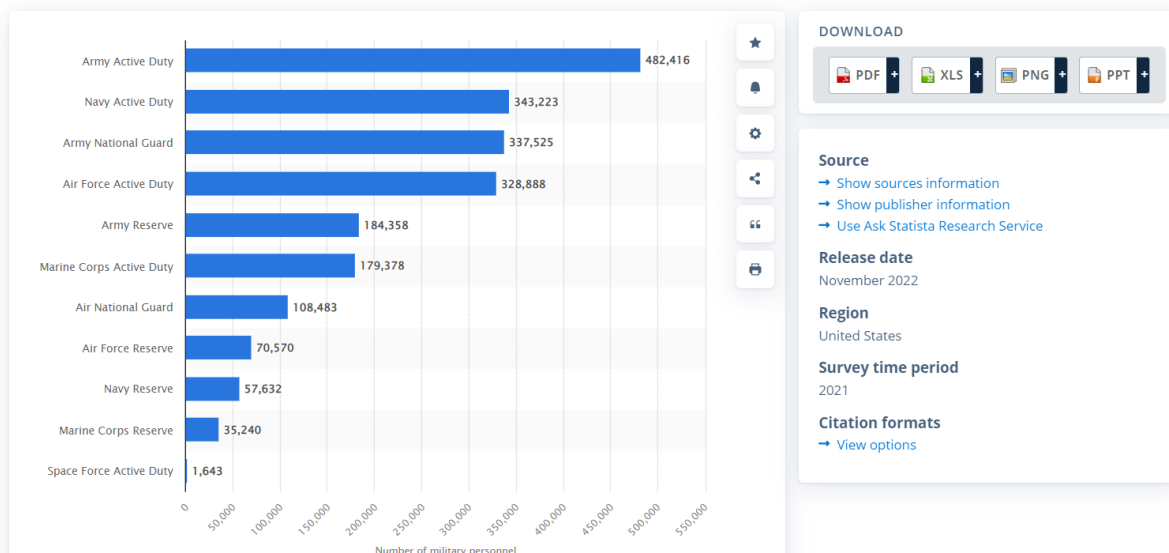

Entire Military Population as of 2021

Army Active Duty	482416
Navy Active Duty	343223
Army National Guard	337525
Air Force Active Duty	328888
Army Reserve	184358
Marine Corps Active Duty	179378
Air National Guard	108483
Air Force Reserve	70570
Navy Reserve	57632
Marine Corp Reserve	35240
Space Force Active Duty	1643
Total	2129356

So the total military population in the USA is 2.13 million personnel.

Active and reserve United States military force personnel in 2021, by service branch and reserve component

Counting Excess Symptoms in 2021

Next I used Tom Renz data to count excess symptoms in 2021 compared to each of the previous 5 years

Renz looked specifically at

- Cancer
- Cardiac and Blood disorders
- Demyelination (nerve destruction)
- Infertility and reproductive dysfunction

Source : [DMED DATA – Renz Law \(renz-law.com\)](https://renz-law.com)

DMED data is important because almost everyone in the military services was vaccinated - it was an order - and because their population is highly controlled and closely monitored

Cancer (Excess = 74,000)

Diagnosis	Query Date	2016	2017	2018	2019	2020	Total 2016 to 2020	2021 (Partial)
Neoplasms (ALL CANCERS)	1/19/2022	41,557	39,139	37,756	38,889	36,050	193,391	114,645

Source : [DMED DATA – Renz Law \(renz-law.com\)](https://renz-law.com)

Average Cases per Year from 2016 to 2020 = 38,678

As you can see, the number of cancer cases averages about 40,000 per year during the 5 years from to 2020. The exact average is $193391/5 = 38,678.2$

Excess Cancer in 2021

In 2021, with the vaccine rollout, the number of cancer cases rose to 114,645 – so subtracting the average per year, we obtain an excess of 75,966.8 cases.

$$114,645 - 38,678.2 = 75,966.8$$

% if the Entire Military Population

As a % of the entire military population in the USA –

$$75966.8/2129356 * 100 = 3.57\%$$

1 in 28 Taken Out of Action

So, in a single year, the vaccine took out 1 in 28 of the entire military by cancer alone. That's quite a cue – and perhaps the only way that an enemy could attack a military as advanced as that of the USA, rendering them unfit for action.

A Breakdown of Types of Cancer

In the table below, you can see some of the cancer diagnoses recorded. Notice the % increase in 2021 in every type of cancer is –

Cancer of the Digestive System	increased by 5.2 x
Cancer of the thyroid / endocrine	increased by 3.73 x
Cancer of Neuroendocrine	increased by 2.5 x
Testicular Cancer	increased by 2.7 x
Ovarian Cancer	doubled
Breast Cancer	increased by 4.3 x

Diagnosis	Query Date	2016	2017	2018	2019	2020	Total 2016 to 2020	2021 (Partial)
Malignant neoplasms of digestive organs	1/19/2022	660	654	633	602	704	3,253	4,060
Malignant neoplasms of thyroid and other endocrine glands	1/19/2022	550	394	369	374	372	2,059	1,950
Malignant Neuroendocrine tumors	1/19/2022	167	135	98	113	117	630	440
Testicular cancer (Amb)	1/10/2022	1,156	1,008	866	880	889	4,799	3,537
Ovarian cancer (Amb)	1/10/2022	121	88	73	82	69	433	181
Breast cancer (Amb)	1/10/2022	934	810	766	792	766	4,068	4,357
Malignant neoplasm of esophagus	1/19/2022	29	36	35	20	26	146	261

The Mechanism is Known

Cancer is kept in check by the immune system. One of the primary functions of the immune system is to remove cells that have mutated or become damaged.

Several scientific papers have demonstrated that the COVID-19 vaccine blocks the functioning of the immune system.

It follows that those vaccinated with COVID-19 vaccines will have a much higher probability of developing cancer, and in those who already have cancer, its development and spread will be accelerated.

Source : [How Bad is my Batch ?](#)

What Civilians Can Learn From This

The military is a large enough sample for us to be able to draw conclusions regarding the effects of the COVID-19 vaccine on the general civilian population.

We can expect an approximate tripling of the number of cancer cases amongst the vaccinated population.

It is estimated that 3.5% of vaccinated persons (1 in 28) will develop cancer as a direct result of the COVID-19 vaccine.

Cardiac / Blood (Excess = 86,711)

Diagnosis	Query Date	2016	2017	2018	2019	2020	Total 2016 to 2020	2021 (Partial)
Diseases of the blood and blood forming organs and certain disorders involving the immune mechanism	1/19/2022	11,533	11,122	10,851	11,773	11,429	56,708	34,486
Acute Myocardial Infarction (Amb)	1/10/2022	324	370	376	366	372	1,808	1,650
Hypertension (Amb)	1/10/2022	2,308	2,323	2,363	2,392	2,415	11,801	53,846
Acute Myocarditis (Amb)	1/21/2022	84	92	116	159	108	559	307
Acute Pericarditis (Amb)	1/10/2022	535	538	522	531	499	2,625	850
Nontraumatic subarachnoid hemorrhage	1/19/2022	219	139	134	170	196	858	640
Pulmonary Embolism (Amb)	1/19/2022	678	701	668	716	968	3,731	3,489
Tachycardia (Amb)	1/10/2022	845	814	893	903	849	4,304	2,595
Disease of the arteries (Amb)	1/10/2022	3,164	2,965	2,938	3,096	2,860	15,023	6,069
Cerebral infarction (Amb)	1/10/2022	887	848	858	888	887	4,368	3,136

Source : [DMED DATA – Renz Law \(renz-law.com\)](https://www.renz-law.com/)

Average Cases per Year from 2016 to 2020 = 20,357

As you can see, the number of cardiac/blood cases averages about 20,000 per year during the 5 years from to 2020. The exact average is $101,785/5 = 20,357$

Excess Cardiac / Blood Cases in 2021

In 2021, with the vaccine rollout, the number of cardiac/blood cases rose to 107,068 – so subtracting the average per year, we obtain an excess of cases.

$$107,068 - 20,357 = 86,711$$

% if the Entire Military Population

As a % of the entire military population in the USA –

$$86,711/2129356 * 100 = 4\%$$

1 in 25 Taken Out of Action

So, in a single year, the vaccine took out 1 in 25 of the entire military by cardiac and blood issues alone, rendering them unfit for action.

A Breakdown of Types of Cardiac

In the table above, you can see some of the cardiac diagnoses recorded. Notice the % increase in 2021 in every type of cardiac disorder is –

Blood diseases	increased by 3 x
Heart attack	increased by 5 x
Hypertension	increased by 23 x
Myocarditis	increased by 3 x
Pericarditis	increased by 1.6 x

Clots	increased by 5 x
Tachycardia	increased by 3 x
Disease of the arteries	doubled
Stroke	increased by 3.5 x

The Mechanism is Known

Once the COVID-19 vaccine enters the circulatory system it causes the lining of the blood vessels (the endothelial cells) to express the spike protein, and this induces an immune attack upon those cells. The result is inflammation and clotting of blood vessels – resulting in clots and stroke. This mechanism is very well established.

Source : [How Bad is my Batch ?](#)

Once the COVID-19 vaccine enters the circulatory system it causes the cells of the heart muscle (myocardium) and cells of the sack that surrounds the heart (pericardium) to express the spike protein. Once again, this induces an immune attack upon these cells resulting in the destruction of heart muscle and the formation of inflexible fibrotic scarring. The heart is a pump under tremendous pressure, so any areas of dead cells will weaken it – resulting in heart attacks, myocarditis, pericarditis and tachycardia. Once again, this mechanism is very well established.

Source : [How Bad is my Batch ?](#)

What Civilians Can Learn From This

The military is a large enough sample for us to be able to draw conclusions regarding the effects of the COVID-19 vaccine on the general civilian population.

We can expect an approximate tripling of the number of cardiac cases amongst the vaccinated population – appearing as “adult sudden deaths”

Source : [How Bad is my Batch ?](#)

We can also expect a 5 x increase in blood clots requiring emergency treatment amongst the vaccinated population, and a 3.5 x increase in strokes.

It is estimated that 4% of vaccinated persons (1 in 25) will develop cardiac issues, clots or strokes as a direct result of the COVID-19 vaccine.

This figure is very close to the figure (3.7%) shown here - [knockout.pdf \(howbad.info\)](#)

Results

- excess cancer alone effected 3.5% of the entire military population
- excess cardiac and blood disorders effected 4% of the entire military population

Given that some of these symptoms may overlap with some people suffering more than one symptom, it is conservative to say that 5% of the entire military force has just been taken out by cancer and cardiac alone.

Please consider this for a moment. The world's most advanced army – 5% of its entire force was just taken out, in a single year, in 2021. How many did we lose in 2022?

Persistence in mandating mRNA vaccines, not just for COVID-19, but now also for flu (bivalent booster), hepatitis, and several other vaccines, is sure to multiply this loss.

War

Given the magnitude of the injuries inflicted upon the US military, as a direct result of deliberate policies, it is a fair assessment to say “You are under attack”.

These are casualties of war

weapon :	biological/chemical
method :	coercion and information control
enemy :	within
